PROFILE

Full-stack software engineer with around 3 years of experience building web applications, most recently compliance-focused software for the disability services sector. Owns features end to end, from business and regulatory requirements through data modelling, API design, frontend and deployment. Works with React, Next.js, TypeScript and TanStack Query on the frontend, and Node.js, Hono, Drizzle, Zod and PostgreSQL on the backend. Experienced with role-based access control (RBAC), audit logging, secure session handling and CI/CD pipelines.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Remix, Tailwind CSS, Material UI, shadcn/ui, TanStack Query, Zustand

Backend: Node.js, Express, Hono, tRPC, Zod, RESTful API design

Database: PostgreSQL, SQL, MongoDB, Drizzle ORM

Security & Quality: Authentication, Role-Based Access Control (RBAC), audit logging, session management, unit and integration testing (Vitest)

Cloud / DevOps: Docker, GitHub Actions (CI/CD), Terraform, Vercel, Git, AWS (EC2, S3)

Tools: VS Code, Jira, GitHub, Postman, Claude Code

PROFESSIONAL EXPERIENCE

LeftclickTech — Full-Stack Software Engineer

Nov 2025 – Present | Project: EterNex, an NDIS (National Disability Insurance Scheme) compliance platform

- Built a corrective action register, Business Improvement Plan generator and root cause analysis tools (5 Whys, Fishbone) to support NDIS Practice Standards compliance workflows.
- Implemented review meeting scheduling and predictive analytics features, and designed the data flows connecting them to related compliance modules.
- Audited the platform's forms library against NDIS requirements, identifying missing forms across the Intake, Care Planning, Clinical, Risk, Allied Health and Assistive Technology modules, and documented findings for the team.
- Implemented Supported Independent Living (SIL) modification request workflows, including supporting charts and forms.
- Built full-stack features end to end (data model, REST API and React interface) using TypeScript, TanStack Query, Hono, Zod, Drizzle, PostgreSQL and Tailwind CSS.
- Translated business and regulatory requirements into technical tasks tracked in Jira.
- Used Claude Code and Atlassian MCP integration in the development workflow for well-scoped and repetitive tasks.

Independent Development — Learning and Building Projects

Nov 2024 – Oct 2025 | Kathmandu, Nepal

- Expanded from frontend into full-stack development, learning Node.js, Express, REST API design, PostgreSQL, MongoDB and Drizzle ORM.
- Built and deployed full-stack projects with Next.js, TypeScript, TanStack Query and the MERN stack, including search, filtering, admin panels and CRUD workflows.
- Studied authentication, role-based access control (RBAC) and type-safe APIs (Zod, tRPC), and published technical articles on these topics on Medium.

Career Break — Family Responsibilities

Aug 2024 – Oct 2024 | Kathmandu, Nepal

- Took time away from work to manage family responsibilities.

Digital Anka (Varicon) — Frontend React Developer

Feb 2023 – Jul 2024 | Pulchowk, Lalitpur, Nepal

- Led the Subcontract module from planning through deployment, proposing UI improvements and building the core features.
- Added an Archive feature and advanced filtering to the Equipment and Employee modules, reducing the steps needed to find a record.
- Optimised the Daily Cost Tracking and Docket modules for faster load and smoother navigation.

- Implemented a 1-hour automatic logout to strengthen session security.

Treeleaf Technologies — Frontend Intern

Oct 2022 – Feb 2023 | Sankhamul, Kathmandu, Nepal

- Built responsive interfaces and a splash page using HTML, CSS, JavaScript and React.
- Applied React design patterns across full development cycles, from UI implementation to testing.
- Wrote unit and integration tests to improve code reliability.

Prixa Technologies — React Intern

Jan 2022 – Mar 2022 | Jawalakhel, Lalitpur, Nepal

- Built a banking app prototype, a movie browser and a real-time weather app, gaining hands-on experience with React and REST API integration.
- Worked on asynchronous data handling, state management and reusable components.

PROJECTS

AI Workforce OS (In Progress)

Multi-tenant workforce management platform with authentication and role-based access control (RBAC), audit logging, employee and project management, Kanban tasks, attendance, leave, a finance workflow, documents, notifications, reports, AI-assisted features and a mobile app.

Tech: *TypeScript, Hono, tRPC, Drizzle ORM, PostgreSQL, TanStack Query/Table, Better Auth, shadcn/ui, Tailwind CSS, Terraform, GitHub Actions (CI/CD)*

Status: In progress — code and demo link coming soon.

Trend Hive

Full-stack e-commerce app with separate user and admin experiences: browsing, reviews and purchases for shoppers, and product, order and image management for admins.

Tech: *MongoDB, Express, Next.js, Node.js, Tailwind CSS, TypeScript*

Code | Live

Movie-App

Full-stack movie dashboard with search, filter and sort, plus an admin panel for managing movie data.

Tech: *Next.js, TypeScript, Tailwind CSS, TanStack Query, Zustand*

Code | Live

Dream Home

Full-stack property booking app with host, property, trip and wishlist features across categories such as Beachfront and Islands.

Tech: *MongoDB, Express, React, Node.js (MERN), Material UI*

Code | Live

EDUCATION

BSc. Computer Science, Kathmandu University — 2017 – 2022, Dhulikhel, Kavre, Nepal
